Contents Volume 3 1992

The horizontal density gradient in hydrodynamic models of salinity around river mouths
K.-R. Jin (Mississippi, Miss., U.S.A.) 1
Evolution du Pb, Zn, Cu, Ni et As dans le Bassin d'Arcachon (France). Impact de la biomasse végétale sur la géochimie d'un environment lagunaire
Y. Lapaquellerie, C. Latouche, N. Maillet, J.-C. Dumon and C. Carruesco (Talence, France) 19
Arsenic et iode des Algues et des Zostères de l'environnement laguno-marin d'Arcachon (France)
J.-C. Dumon and Y. Lapaquellerie (Talence, France) 31
On estimating spatial and temporal variations in the properties of ice in the polar oceans
G.A. Maykut, T.C. Grenfell (Seattle, D.C., U.S.A.) and W.F. Weeks (Fairbanks, Alaska, U.S.A.) 41
Summer distribution and ecological role of seabirds and marine mammals in the Norwegian and Greenland seas (June 1988)
C.R. Joiris (Brussels, Belgium) 73
Predictive bio-optical relationships for polar oceans and marginal ice zones
B.G. Mitchell (La Jolla, Calif., U.S.A.) 91
Near-surface circulation over the Yermak Plateau in northern Fram Strait
T.O. Manley (Middlebury, Vt., U.S.A.), R.H. Bourke (Monterey, Calif., U.S.A.) and K.L. Hunkins (Palisades, N.Y., U.S.A.) 107
On the mesoscale structure of the frontal zones in the Nordic seas
V.B. Rodionov (Moscow, Russia) 127
A time-dependent depth-integrated barotropic physical model of the Bering/Chukchi Seas for use in ecosystem analysis
P.G. Shuert and J.J. Walsh (St. Petersburg, Fla., U.S.A.) 141
Distribution of the two types of ice diatom communities in the Antarctic
H. Meguro (Sendai, Japan), H. Fukushima and T. Matsuda (Tokyo, Japan) 163
The Weddell-Scotia marginal ice zone: Physical oceanographic conditions, geographical and seasonal variability
R.D. Muench (Bellevue, Wash., U.S.A.), B.A. Huber (Palisades, N.Y., U.S.A.), J.T. Gunn (Bellevue, Wash., U.S.A.), D.M. Husby (Monterey, Calif., U.S.A.) and D.G. Mountain (Woods Hole, Mass., U.S.A.) 169
Dynamics of the western Baltic
W. Fennel and M. Sturm (Rostock-Warnemünde, Germany) 183
Global Ecological Consequences of 1982–83 El Niño–Southern Oscillation by P.W. Glynn (Editor)—
W.H. Quinn 207
Guide for authors
Cadmium in the North Sea—a mass balance
W. Kühn, G. Radach and M. Kersten (Hamburg, Germany). 209
The ice fauna in the shallow southwestern Beaufort Sea, Arctic Ocean
A.G. Carey Jr. (Corvallis, OR, USA) 225
Circulation and distribution of suspended matter in the Sporades Basin (northwestern Aegean Sea)
X. Durrieu de Madron, F. Nyffeler (Neuchâtel, Switzerland), E.T. Balopoulos and G. Chronis (Hellinikon, Greece) 237
A numerical study of wind stress curl effects on eddies and filaments off the northwest coast of the Iberian Peninsula
M.L. Batteen, C.N.Lopes da Costa and C.S. Nelson (Monterey, CA, USA) 249
On the formation of a western boundary current in the Bay of Bengal
B. Johns (Reading, UK) and A. Ali (Dhaka, Bangladesh) 267
Water-mass formation and Sverdrup dynamics; a comparison between climatology and a coupled ocean–atmosphere model
M.H. England, M. Tomczak (Sydney, N.S.W., Australia) and J.S. Godfrey (Hobart, Tasmania, Australia) 279
Report
J.C.J. Nihoul and S. Djenidi (Liège, Belgium) 307
On the wind-driven coastal upwelling in the Gulf of Lions
B. Johns (Reading, U.K.) and P. Marsaleix, C. Estournel and R. Véhil (Toulouse, France) 309
A model study of "bump" induced western boundary current variabilities
L.-Y. Oey, T. Ezer, G.L. Mellor (Princeton, NJ, USA) and P. Chen (Hoboken, NJ, USA) 321
Topographic and eddy effects in a primitive equation model of the Iceland–Faeroes Front
S.J. Maskell (Exeter, UK), A.D. Heathershaw and C.E. Stretch (Portland, UK) 343
On the use of the σ-coordinate system in regions of large bathymetric variations
E. Deleersnijder (Louvain-la-Neuve, Belgium) and J.-M. Beckers (Liège, Belgium) 381
Simultation of the Norwegian Coastal Current in the vicinity of the Halten Bank: comparison with observation and process study of bank-induced meanders
L.-Y. Oey, Y.H. Zhang and P. Chen (Princeton, NJ, USA) 391

Variability of shelf and adjacent seas
R.V. Ozmidov (Moscow, Russia) 417
Preliminary results of 3-D baroclinic numerical models of the mesoscale and macroscale circulations on the North-Western European Continental Shelf
E. Delhez and G. Martin (Liège, Belgium) 423
Model of the Algerian Current's instability
J.-M. Beckers and J.C.J. Nihoul (Liège, Belgium) 441
CO_2 partial pressure in Northeast Atlantic and adjacent shelf waters: Processes and seasonal variability
B. Schneider, K. Kremling and J.C. Duinker (Kiel, Germany) 453
Thermal exchanges at air–water interfacies and reproduction of temperature vertical profiles in water columns
C. Dejak, D. Franco, R. Pastres, G. Pecenik and C. Solidoro (Venice, Italy) 465
Numerical simulation of dispersal patterns of red sea bream juveniles, *Pagrus major,* in Nyuzu Bay, Japan
T. Yanagi (Matsuyama, Japan), S.-I. Okada (Yokohama, Japan) and K. Tsukamoto (Tokyo, Japan) 477
Maintenance of quick fluid rotation in the cores of long-lived oceanic eddies
G.G. Sutyrin (Moscow, Russia) 489
Frazil ice formation due to difference in heat and salt exchange across a density interface
A.D. Krylov (Kaliningrad, Russia) and A.G. Zatsepin (Moscow, Russia) 497
A 3D, finite element model for baroclinic circulation on the Vancouver Island continental shelf
R.A. Walters (Tacoma, WA, USA) and M.G.G. Foreman (Sidney, Canada) 507
Mesoscale stability of an ocean current over the continental slope in the Bryan–Cox primitive equation model
M. Ikeda and L.-Q. Zhang (Dartmouth, Canada) 519
Theoretical distributions of suspended particles in the ocean and a comparison with observations
E.A.H. Zuur and F. Nyffeler (Neuchâtel, Switzerland) 529

Book Review
Oceanography of Asian Seas. Edited by K. Takano — W.J. Wiseman jr. 539
